## ACROSS THE USA

By Tim Dillon  
**INMAN:** USA must  
be No. 1

LOS ALAMOS, N.M. — Bobby R. Inman, head of a research venture formed by a dozen USA high-technology firms, warned that the USA could realize gains from computer technology in the 1990s only if it leads the field. "The information-handling industry is growing at a rate of 15 percent a year. That's a trillion-dollar industry in the 1990s. That's 15 million jobs," he told a conference here. He said half those jobs should be in the domestic industry if the USA is to lead the world.

INMAN

STATINTL

Texas Eastern Corp. Tuesday announced the election of retired Adm. Bobby R. Inman, former deputy director of the Central Intelligence Agency, to the firm's board of directors.

Inman, 52, is chairman, president and chief executive officer of newly created Microelectronics and Computer Technology Corp. of Austin, Texas. Microelectronics is a joint venture of U.S. corporations for computer development.

Inman was appointed CIA deputy director in 1981. In July 1982 he retired from the Navy with the permanent rank of admiral.

He already serves on the boards of Dravo Corp., Science Applications Inc., Western Union Corp., Tracor Inc.

Inman also works with the Arms Control Association, the Association of Former Intelligence Officers and the Rickover Foundation.

He is a senior fellow of the Hoover Institution of War, Peace and Revolution at Stanford University and serves on the Defense Science Board.
